## PROFILE

BSIT student who leads full-stack system design and development through AI-assisted development practices, defining requirements, conducting rigorous testing, and iterating based on real feedback. Developing hands-on coding fundamentals alongside a growing interest in networking and systems administration.

## EDUCATION

**BS Information Technology**
Dalubhasaang Politekniko ng Lungsod ng Baliwag - Institute of Information Technology and Innovation
Expected Graduation: 2026

**Secondary:** Pres. Diosdado P. Macapagal Memorial High School

## TECHNICAL SKILLS

**Full-Stack Development:** Basic understanding of front-end, back-end, and database technologies (React, JavaScript, HTML, CSS, PHP, Laravel, Node.js, Express.js, PostgreSQL, MySQL, Sequelize ORM)

**Tools:** VS Code, Devin, Cursor, Git, GitHub

**Networking Fundamentals:** Cisco Packet Tracer, basic networking, hardware troubleshooting

**Operating Systems:** Windows, Linux/Ubuntu

## CAPSTONE / ACADEMIC PROJECT

**Web-Based Family Tree System for Household Profiling, Resident Verification with Data Analytics for Barangay San Roque**

Led the design, testing, and iterative development of a full-stack academic capstone system using React, Node.js, Express, PostgreSQL, and Sequelize with AI-assisted development tools. Defined system requirements, conducted extensive functional testing, and resolved bugs identified during live system use. The system features household profiling, resident verification, family tree visualization across multiple households, resident self-registration with ID verification, and a data analytics dashboard. Fully deployed and tested using Railway and Vercel.

## CERTIFICATIONS & TRAINING

- Free Coding Bootcamp: Basic Web Development Workshop - Zuitt (November 2024)

## OTHER SKILLS / EXPERIENCE

- Video Editing - Alight Motion (2018-2021)
- Photo Editing - Canva (2018-Present)
- Basic hardware troubleshooting

## AREAS OF INTEREST

Exploring networking and systems administration alongside full-stack development.
